

The product can be called different names. The names are as follows:

1. Composite pipe (Most common)
2. Multilayer composite pipe
3. MLC Pipe
4. PE-AL-PE Pipe (Technical name as per government standard)

Product introduction

Jindal MLC Pipes are multilayer pipes, that have an inner and outer layer of HDPE (High Density Polyethylene) and a middle layer of Aluminum. This enables Jindal MLC Pipes to combine the advantages of Metal and plastic pipes together, whilst eliminating their disadvantages at the same time.

Our most unique feature is that the pipes are bendable and available in coils of up to 200 meters. This eliminates the need for Elbow and coupler joints, which significantly reduces any chances of leakages, and also saves cost and time.

Not only that, but Jindal MLC Pipes are made using 100% food grade material and have a working life of 50 years.

All these features and they cost just about the same as CPVC Pipes.

If the person is already familiar with composite pipes, we need to tell them why they should choose our brand instead of any other brand.

Jindal Tubes has over 20 years of experience with composite pipes and is one of the first companies to introduce composite pipes to India. Jindal Tubes' testing facility and quality parameters are unmatched in the industry. Jindal Tubes has invested a lot of time and money in Research and development to optimize its fittings for reliability and make it easy for the plumber to install. Jindal Tubes has also optimized its costing and currently offering the most competitive rates on the market. Jindal Tubes sources its raw materials only from reputed companies in India and from Europe.

Is this company connected to Jindal steel / JSW / OP Jindal family?

Yes, Jindal Tubes is a unit of the DS Jindal Group. DS Jindal was the elder brother of OP Jindal. It is part of the same family.

There are 3 types of Brands available on the market for composite pipes (This is just for context):

1. European brands, that are based in Europe and importing from Europe.
 - Double the price, same quality as Jindal MLC Pipes
 - No ISI Certification since the product is not made in India
 - Company names: Viega, Wavin, Multi tubro, Huliott
2. Indian Companies importing from China
 - Slightly more expensive than Jindal MLC Pipes
 - Inconsistent quality
 - No product standard quality
 - Poor quality fittings
 - No ISI certification
 - No brand value
 - Company names: Unipro
3. Indian Manufacturers
 - Cannot match Jindal's testing facility and quality measures
 - Lack of experience in the industry compared to Jindal
 - Source cheap raw materials to cut cost
 - Poor quality of fittings
 - Company names: Kitec, Nexgen Composite, Vectus, Supreme
