

FAQs: Frequently asked questions

Q. Is this a plastic Pipe or Metal Pipe?

A. This is a multilayer pipe that has inner and outer layer of plastic and middle layer of aluminum

Q. Where is the factory located?

A. Our factory is located in Dehradun, Uttarakhand. All products are manufactured in house, with strict quality measures.

Q. How is the pricing compared to other pipes?

A. Composite pipes are around 5-7% more expensive than CPVC pipes, which is very marginal. It costs around the same as GI pipes, but offers much more value for money.

Q. How is this product superior to other metal or plastic pipes?

A. Composite pipes are multilayer, wherein they combine the advantages of plastic and metal pipes together. Composite pipes are bendable, which makes them quick and easy to install with lesser joints. Lesser joints means much less chances of leakages and less cost also. Composite pipes have a working life of 50 years.

Q. What is the warranty?

A. We give a 10 year warranty, but stay assured composite pipes will last you more than 50 years.

Q. What all applications can composite pipes be used for?

A. Composite pipes are used for Hot & Cold water supply, Gas supply and Compressed Air supply.

Q. What is the discount structure like?

A. Sorry sir, we cannot disclose the discount structure right now. We will first have to properly understand your requirements and investment value. My senior will get in touch with you to provide you additional details.

Q. What is the ROI (Return on investment) for these pipes?

A. Around 30-40% easily
